

**Meeting 5 - Thursday 24 September - 9:30-17:30**  
**Spatial planning, traffic management and soft measures**

This technical focus group meeting will focus on non-regulatory and non-fiscal policy instruments that might be introduced to encourage the application of various technical and non-technical options for reducing transport's GHG emissions. It will be based on the information contained in Paper 8 *Infrastructure and spatial policy, speed and traffic management* and Paper 9 *Information, R&D, Pilots, Voluntary Agreements*. This will cover:

- Infrastructure development, including considering GHG emissions in assessment frameworks
- Spatial planning, including planning in urban and non-urban areas
- Traffic management policy and speed limits
- Information, including vehicle labelling, awareness raising, public transport information
- Fuel efficient transport behaviour, including eco-driving
- Public procurement
- R&D programmes, including demonstration and pilot programmes

Each session will consist of a presentation from the project team, followed by a discussion.

***Agenda***

9:00 Registration

9:30 Welcome

9:45 Introduction to the project

10:00 Spatial and infrastructure policy (**presentation by Tariq van Rooijen from TNO**)

11:15 Coffee break

11:30 Environmental assessment frameworks (**presentation by Huib van Essen, CE Delft**)

12:15 Conclusions

*13:00 Lunch*

14:00 Traffic management and speed policy (**presentation by Tariq van Rooijen from TNO**)

15:00 Tea Break

15:15 Information, fuel efficient driving, public procurement, R&D and demonstration and pilot programmes (**presentation by Ian Skinner from AEA**)

16:45 Conclusions

17:15 Closing remarks

17:30 End of the meeting
